

Project outputs: drivers of SC-NTD recommendations

What we know about NTD drug last mile supply chain

NTD supply chain landscape analysis

Identifying NTD “last mile” SC strengths, weaknesses and strategies

Learning from other public health programs

Non-NTD supply chain landscape analysis

How non-NTD experience informs NTD last-mile supply chains

Learning from commercial sector supply chains

Segmentation analysis

Applying commercial sector approach to public health SCs to analyze possible NTD drug piggy-backing on existing distribution systems

Benchmarking analysis

Measurement of NTD drug supply chain performance against other comparable supply chains

Developing NTD supply chain assessment tools

Supply chain assessment tools

Evaluation tools for assessing last-mile NTD supply chains at three levels:

central

intermediate

health facility

Conducting NTD supply chain assessments

Country reports

Based on assessments in three countries:

Malawi

Ghana

Tanzania

Providing recommendations for NTD supply chains

Development plan

Recommendations for NTD last-mile supply chain optimization globally and for three focus countries

Summary report

Summary overview of all project deliverables and recommendations
