

# IMPACT:

## UI-FHS PROJECT

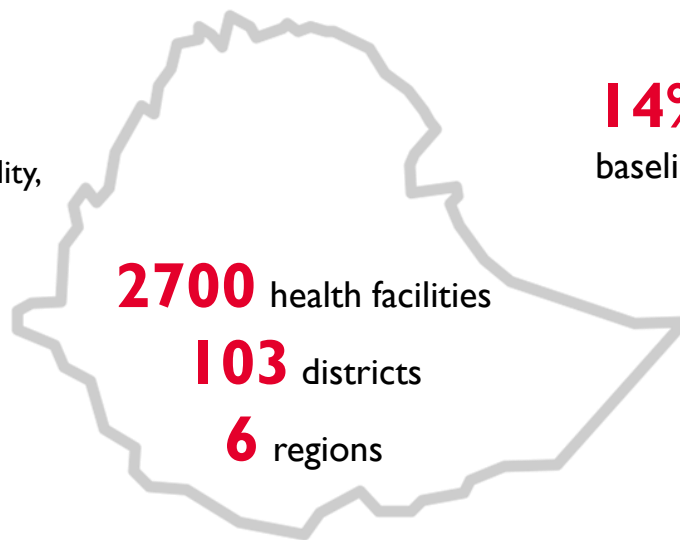

---

JSI's Universal Immunization through Improving Family Health Services (UI-FHS) project works to improve the routine immunization system in Ethiopia.

The project operationalizes and strengthens Ethiopia's national routine immunization strategy, Reaching Every District (RED), to improve the availability, utilization, quality and sustainability of immunization services in the country.

**92%** of district health offices have established quality improvement teams to improve the quality of immunization services

Improving data quality – Health posts with consistent data reported across facility reporting tools:  
baseline **37%**, current **63%**

As of December 2018, UI-FHS has accomplished...

Districts with a complete microplan, an essential document for planning and managing immunization services:

**14%**  
baseline

**89%**  
current

Districts with a catchment map of their service delivery areas:

baseline **46%**, current **94%**
